

## Global Accelerator Program

8-week summer program in New York or London

Our cohort-based flagship Accelerator program is structured around an 8-week work placement in your chosen career field.

Together with their placements, all Accelerator students complete our proprietary career-readiness (8-unit) and commercial-awareness (4-unit) training courses, delivered in-person.

Accelerator students also enjoy a calendar of social events and a complement of on-the-ground program directors & coaches.

The Global Accelerator Program is available in the summer only. Learn more & apply [here](#).

New York or London

All nine career fields

## Global Explorer Program

6, 8 or 12-week summer program in 9 cities year-round

A flexible version of our flagship Accelerator program, the Explorer program is designed for students looking to live, work and travel further afield and more independently.

Together with their 6, 8 or 12-week placements, all Explorer students complete our proprietary career-readiness (4-unit) and commercial-awareness (4-unit) training courses, delivered online.

The Global Explorer Program is available year-round, Learn more & apply [here](#).

All nine US and UK locations

All nine career fields

## New Remote Program

6, 8 or 12-week summer program in 9 cities year-round

A highly flexible version of our Explorer program, the Remote program is designed to enable students to gain experience and dramatically enhance their career-readiness without needing to travel or interrupt their students.

Together with their 6, 8 or 12-week remote placements, all Remote students complete our proprietary career-readiness (4-unit) and commercial-awareness (4-unit) training courses, delivered online.

The New Remote Program is available year-round. Learn more & apply [here](#).

All nine US and UK locations

All nine career fields

## CIxUC Merced Explorer+ Program

8-week summer program in Los Angeles or SanFran

Provided in collaboration with [UC Merced's Gallo Management Program](#), the Explorer+ program is now open to all students, including students beyond the University of California system.

Together with their 8-week placements, all Explorer+ students complete a condensed version our proprietary career-readiness (4-unit) and commercial-awareness (4-unit) training courses, delivered in-person. And all students enjoy a complement of on-the-ground program directors & coaches.

Students enrolled in UC Merced's [MM program](#) are entitled to automatic acceptance and additional [Student Aid](#). Learn more & apply [here](#).

Los Angeles or SanFran

All nine career fields

## Notes on COVID-19

In response to the outbreak of COVID-19, we have elected to suspend all non-US and non-UK programs for the 2019/20 academic year.

This decision directly affects our Explorer program only, reducing the available destinations from 20 to 9.

All Accelerator, Explorer+ and Remote programs remain unaffected.

The driving force behind this decision is to allow us to allocate the full weight of our resources to our US- and UK-based programs, to most effectively support the interests of our, primarily US- and UK-based, student body.

To that end, we have also elected to increase the availability and accessibility of the following programs:

### CI<sup>X</sup>UC Merced Explorer+ Program, Los Angeles & San Francisco

Summer 2020 intake increased. Now open to all undergraduate and graduate students (previously limited to University of California students).

Extended [ISA alternative funding](#) option to Explorer+ program (previously limited to Accelerator students).

### Global Accelerator Program, New York and London

Summer 2020 intake increased.

### Global Explorer Program / Global Remote Program

Spring, summer & fall intake increased (for US and UK).

CI 2020 – Program Status – March 13, 2020

## About CI

CI was founded in London in 2011.

CI provides structured outcomes-focused programs, which combine work-based practical training, class-based seminars and workshops, and on-the-ground coaching.

Early-career outcomes have lasting effects. In an environment where almost half (46%) of recent graduates fail to secure graduate-level employment, we provide a battle-proven method for students to protect – and dramatically enhance – their investments in higher education.

CI creates globally engaged, career-ready graduates.

CI alumni secure graduate-level employment 3 times sooner and receive starting salaries 30% higher than the US national graduate average.

Our unique employer-subsidized funding model means our programs are more accessible and offer significantly greater dollar-for-dollar value than other similar work-based and study abroad-style programs, including those offered by traditional institutions.

To learn more about CI, visit [www.city-internships.com](http://www.city-internships.com).
